

DACC Master PFD

(1e³ installations)

Legend

- V1 / V2 / V3 = water removal venturis
- WT PG = wind turbine powergen
- MS1 = CO₂ / CH₄ removal molecular sieve
- MS2 = N₂ / O₂ separation molecular sieve
- MR = methane reformer
- O₂ = gaseous oxygen storage tank
- N₂ = gaseous nitrogen
- CO₂ = gaseous carbon dioxide storage tank
- CO₂ Fix = hot carbon dioxide fixation by injection
- GT PG = geothermal powergen
- H₂/O₂ PG = expanding gas powergen
